

## KIND WORDS FROM OUR PARTNERS

### EVANGELISTIC INT'L MINISTRIES

*"... We are extremely dedicated to using Breedlove's food because their nutrition levels are so much higher and because Breedlove is committed to helping people."  
- President Mike Goodwin*

### COMMUNITIES IN SCHOOLS

*"Breedlove fills the bellies of the next generation of leaders, making success in life possible."  
-Hannah Jones*

### OPERATION HOPE

*"When two dedicated organizations such as Breedlove and Operation HOPE come together with a common goal of feeding the hungry, wonderful, life-changing things happen."  
-Board Chairman Brad Bouma*

## MISSION

Partnering globally to provide nutritious food to the world's most vulnerable

## VISION

Transforming lives through hope and encouragement

## ABOUT

We are a nonprofit that has been developing, producing, and shipping innovative, low-cost, nutritional humanitarian food aid products to sustain life and restore health domestically and internationally since 1994.

**GIVING HOPE.  
SERVING  
BILLIONS.  
ONE MEAL  
AT A TIME.**

**Breedlove®**  
INNOVATIVE HUMANITARIAN RELIEF

## OUR EXPERIENCE

- Since 1994, we have distributed over 1.78 billion servings to communities both local and abroad, totaling over 67 countries.
- In 2000, we were the first to provide food products to the International Food Relief Partnership (IFRP) implemented by the U.S. Agency for International Development (USAID).
- Today, we have over 80 local and international partners.

## HOW WE'RE UNIQUE

- Breedlove is the largest nonprofit food processor in the world, dedicated to humanitarian aid.
- Our Research and Development (R&D) team develops food products that specifically meet each client's needs, in terms of flavoring, vitamins and minerals, proteins, and calories.
- We have developed products that can be used for domestic or international needs.

## DEHYDRATED BLENDS

Our dehydrated meals go farther and cost less. Because of the size and dehydrated condition of each meal, they pack lighter, are shelf stable, and provide more servings per weight, per package.

These foods can be classified in three groups according to the main ingredients: Vegetable Blends, Lentil Blends, and Rice Blends. Their preparation only requires water and between 25 to 30 minutes of cooking time.

Dehydration not only allows a long shelf life (24 months), but also allows more servings per delivered unit - 1 million servings per 40-foot container.

## READY-TO-USE FOODS (RUFs)

We process a variety of RUF formulations featuring Vitanut Pro<sup>®</sup>. Vitanut, an energy-dense, nutritionally fortified peanut paste product, is designed to meet the requirements of moderately and severely malnourished individuals.

The product consists of a cereal-soy base that is fortified with vitamins and minerals, peanut paste, and canola oil. Its texture and flavor can be compared to peanut butter.

It offers high protein and has been designed to provide high-nutrient absorption.

The shelf life has been tested and is fully stable for up to 24 months under extreme temperature conditions.
